Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: With regard to Independent Claims 149 and 160, the Applicant agreed to amend the claims to incorporate claim language referring to the actuating member moving the lamp bulb filament in a direction substantially perpendicular to the reflector axis. With regard to Independent Claims 172 and 176, the Applicant further discussed the patentability of the switch mechanism and requested an updated prior art search. With regards to Independent Claim 221, the Applicant agreed to amend the claim to correct the lack of antecedent basis (i.e., "actuating" to be replaced with "actuation"). With regard to newly submitted Claims 226-235, the Applicant agreed to incorporate language detailing the actuating member being externally operable by a user while maintaining electrical contact and operation of the flashlight, so as to render patentability over the prior art.
